#### **DETAILED ACTION**

### Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on

sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 7, 8, 10-12, 24-28, 30, and 32 are rejected under 35 U.S.C. 102(b) as being

anticipated by Sato et al (US 4,600,048).

Sato et al disclose a system for controlling solidification of the molten metal comprising a

substrate (1), a writing system (9), an erasing system (17), the writing system is capable for

imposing a thermal gradient pattern in multiple elements on the substrate, wherein the

writing system is a laser, a drive system (2), a container for molten metal, a nozzle connected to

the container, and a pressure system to apply pressure dispense on the nozzle on to the substrate

(figure1).

# Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1725

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 6, 9, 29, 42, 45-47, and 50-51 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sato et al (US 4,600,048).

Sato et al disclose the claimed invention above, but fail to teach casting with a belt and a prism to reflect light.

However, Sato et al disclose that strip casting can be used in either a roller or a belt. In addition, Sato et al disclose using laser with a condenser lens. Therefore, substituting a condenser lens with a prism would have been obvious to one of ordinary skill in the art, since both devices are functionally equivalent.

#### Allowable Subject Matter

5. Claims 43-44 and 48-49 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior arts of record fail to teach having a sensor positioned to provide information about the effect of the gradient pattern.

A ...

## Response to Arguments

6. Applicant's arguments filed 6/28/05 have been fully considered but they are not persuasive.

The new amendment, "wherein the gradient pattern comprising multiple element contacts..." is not defined over the prior art of record, since Sato et al's apparatus is capable of producing the gradient pattern. With broadest interpretation, the pattern can be in one direction having heat spots on the same line. However, the apparatus of Sato et al is not capable of producing the pattern as shown in applicant's disclosure in figures 5a and 5b. In applicant's drawing, the pattern is in a matrix format. However, applicant needs to claim such pattern.

### Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Len Tran whose telephone number is (571) 272-1184. The examiner can normally be reached on M-F, 8:30 - 5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Dunn can be reached on (571) 272-1171. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
